MessageCloud Secure Cloud Messaging

MessageCloud - Protect End-user Information Delivery To Make Your Services Secure

MessageCloud ensures quick and secure delivery of sensitive information by integrating seamlessly into our suite of solutions

With the shift of applications to the cloud, cloud-based messaging is becoming increasingly popular. Messages sent over the cloud are immediately received by all of the recipients.

MessageCloud goes further by ensuring that sensitive messages are fully encrypted using advanced encryption methods that result in

MessageCloud - Deliver sensitive information such as PINs and transaction information to end users ensuring total privacy

secured message delivery. Keeping customer data safe is an essential part of modern-day business resulting in consumer confidence and preventing security breaches.

By using real-time encryption message technology, sensitive information such as customer PINs and other real-time information can be delivered quickly and securely.

Benefits:

- **Increase Consumer Confidence** - Secured messages ensure consumers feel confident in your business - almost 80% of consumers are concerned about data security.
- **Secure Delivery** - All messages sent to end users are fully encrypted and are only decrypted upon being received.
- **Achieve Compliance** - PCI, health, finance & government entities demand that businesses follow strict guidelines that protect consumers' rights and mitigate risk.
- **Remove SMS** - SMS messaging uses old, outdated cellular network technology - it's outdated, archaic, expensive and insecure - contents of each text message are viewable to mobile carriers and on the mobile network.
- **Instant Messages** - Send data such as PINs, real time transaction information and other confidential data safely and securely.

Compliance

Addresses PCI DSS, government and general compliance.

Secure & Fast Deployment

Deploy the solution on a fast-track basis.

No Changes

The solution can be deployed without making any changes to existing infrastructure and integrates seamlessly with our suite of solutions.

MessageCloud Secure Cloud Messaging
